

FM PROTECTOR

Track and protect your vehicles and drivers in real-time, anytime, anywhere. Never has tracking been this convenient or user-friendly. Self manage vehicles and drivers via an easy to use website, or use any cell phone to query a vehicle's whereabouts and receive immediate event notifications.

BENEFITS

- Self manage your fleet
- Know where your vehicles are
- Know where your vehicles were
- Know when drivers enter or exit pre-set locations
- Enhanced security for drivers & vehicles
- Drivers are deterred from over speeding & reckless driving
- Instant notification of unauthorised movement, theft & tow-away
- Improved safety and reduced risk
- Reduced operational costs
- Increased staff productivity
- Improved customer service
- Peace of mind

FEATURES

- Real-time Vehicle Tracking
- Historic Trip Replay
- Movement Reports
- SMS & Email Event Notifications
- Cell Phone Location Requests
- Street / Google Satellite mapping
- Remote Panic Button
- Automatic Theft Detect
- Geofencing
- Simple and Non-invasive Installation
- Voice Prompts
- Backup Battery
- Task Scheduling

SOLUTION COMPONENTS

The product includes an internal GPS and GSM/GPRS modem to record GPS positions and trip information for real-time tracking, and enables communication between office and vehicle. Unit installation is quick and non-invasive.

As a security measure, the product is equipped with a backup battery which starts to operate if the supply to the main battery is cut. Tracking continues without interruption.

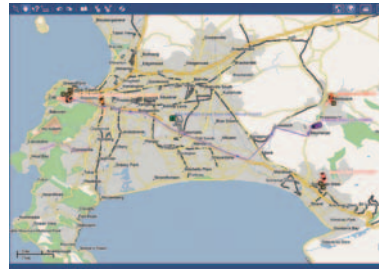

Your vehicles are available and protected at anytime, anywhere.

WEB AND CELL PHONE

The FM Protector is an easy-to-use personal vehicle management system that delivers vehicle and driver information to you through our website or directly to your cell phone. An independent website was developed for FM Protector and this secure, easy-to-use service does not require any additional software to be loaded to your computer.

Configure driving event preferences and notifications according to your needs. All event notifications can be sent to multiple cell phones or email addresses.

Manage your vehicles on the user-friendly website and query vehicle locations from your cell phone.

* Detailed Street Level Mapping

* Google Satellite Mapping

* Geofencing

BENEFITS

- Information is accessible anytime, anywhere
